

Navnautik Technical Services

Navnautik Pte Ltd based in Singapore and Navnautik Technical Services Private Limited based in Salt Lake, Kolkata, India, provide professional services for shipbuilding designs of vessels upto about 150m.

One of the key tasks of the company is preparation of basic and detail design complete with digital information based on technical data provided in the shipbuilding designs for using in computer numerically controlled plate cutting machines. This part of the work flow has been accomplished by a specialized system of ship designing with seamless integration with the cutting software provided by **Lantek** of Spain.

With the technical guidance from **Lantek** professional, Navnautik has been able to handle several projects meeting the tight deadlines and stringent requirements that are quite normal in shipbuilding industry. The special needs of Plasma cutting in the industry has been a tried and tested functionality of **Lantek** software and all the relevant peculiarity of Plasma cutting has been tackled with flexibility in the software.

Navnautik Technical Service is currently using **Lantek Expert** cutting software for their production work and this has highlighted the fact that **Lantek** is able to meet the needs of Navnautik's customers in South East Asia, China and Middle East.

Lantek has established two branch offices in India (main office in Bangalore and sales/service office in Delhi) under the registered name of **Lantek Automation Pvt. Ltd.**
